

Job Placement Survey of Class of 2019

The Department of Library and Information Science at the Catholic University of America conducted a job placement survey of the 35 graduates who graduated in Summer 2018, Fall 2018, and Spring 2019. The results will be included in the Library Journal report, published each October, on placement rates of graduates of ALA-accredited programs. Twenty-five of the 35 graduates invited to participate took part the survey. The following data are valuable for the department to learn the career development of graduates.

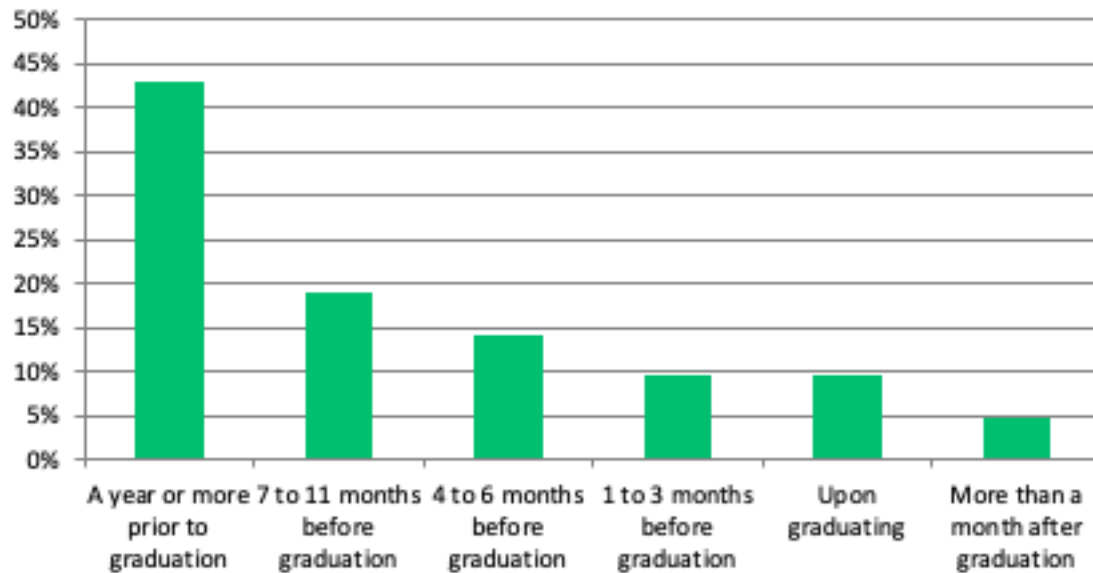

Major findings:

- 91.67% of respondents were employed full-time
- 44% of respondents were employed in a library or information setting before beginning the program
- 96% of respondents were in a permanent employment position
- 21% of respondents were employed in a government library (state or federal government agency)
- 32% of respondents are responsible for digital content management in their current placement
- 83% of respondents were satisfied with their current job
- 33% received a raise upon granting of the MSLIS degree
- The average annual salary for the 25 respondents is \$56,100

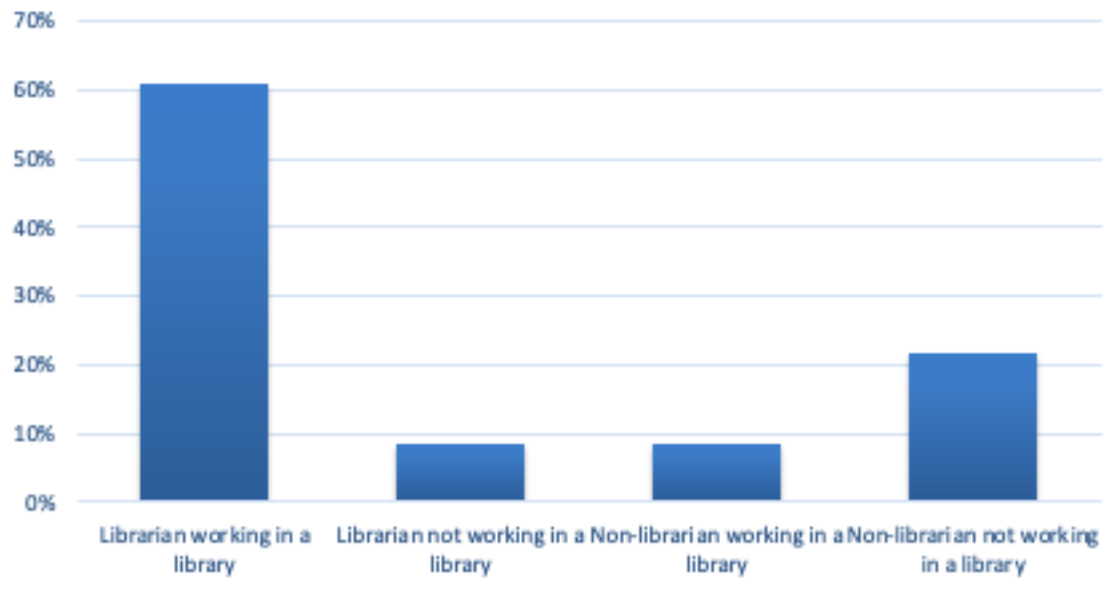

Do you have a full-time or part-time position?

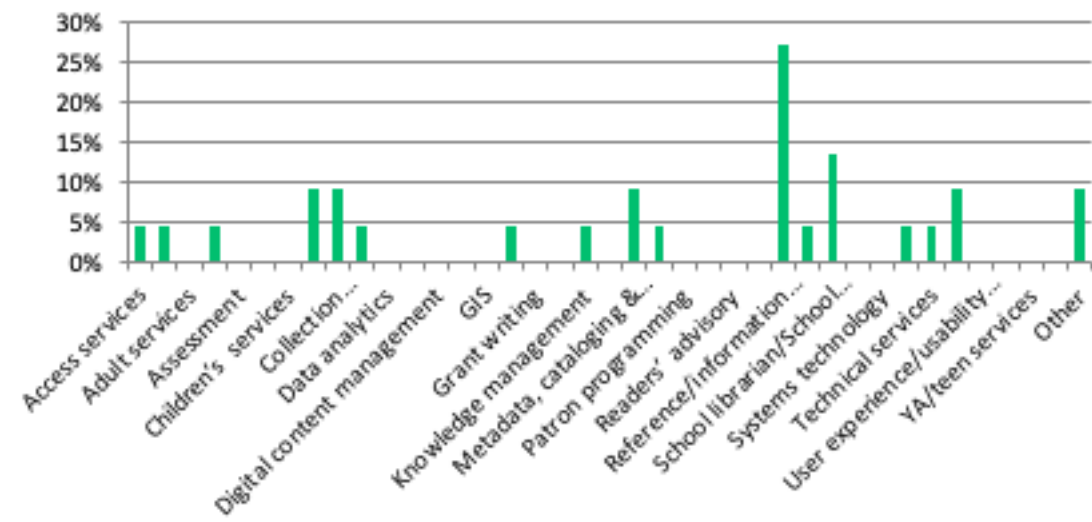

When did you begin your job search?

Which type of position do you hold?

Which is your primary job assignment? Select only one.

If you remained with an existing employer upon graduation, did the granting of the Master's degree change your employment status?
