

## Spring 2024 Comps Questions

### Question 1.

Identify three professional ethical principles that you consider to be of great importance in guiding the endeavors of information professionals. For each principle, provide a description and explain (using examples where appropriate) how it could be applied to a library or information service setting of your choice. Lastly, based on at least one of the three professional ethical principles, discuss potential conflicting values that could create ethical dilemmas for information professionals.

### Question 2.

To meet user expectations, today's libraries and information organizations provide or are experimenting with an array of technologies. Examples include digital collections, remote access, virtual reference services, Augmented Reality (AR) and Virtual Reality (VR), Artificial Intelligence (AI), gamification, smart libraries, etc. For a library or information service setting of your choice, select one type of library or information service that could be implemented or enhanced using one or more trending technologies and explain your choice. Discuss potential opportunities and challenges of using the technology(ies) to enhance library/information services.
